Declaration of Compatibility

SLK Hoist Slings

SLK Vertriebs GmbH
Am Herdicksbach 18
D-45731 Waltrop

With this declaration of compatibility, SLK Vertriebsgesellschaft mbH confirms that the slings distributed by them can be used with all mobile patient lifts (sit-to-stand lifts, universal lifts, and ceiling hoists) listed below from other manufacturers that are equipped with a suspension system with open or closed hooks. These hooks must be capable of receiving a 50 mm wide sling loop and maintaining it under tension. The lift must be equipped with a 2-, 3-, 4-, or 8-point spreader bar. Systems with perforated metal or plastic eyelets are not compatible.

If the hoist you are using is not on this list, we recommend that you contact us to verify and confirm the compatibility of our slings with that hoist.

Our risk assessment has shown that when our hoist slings are used as intended on the listed patient hoist systems and spreader bars, there are no additional risks compared to the original system combinations.

Compatibility is confirmed on this basis.

We confirm the conformity of our patient slings with the essential safety and performance requirements for medical devices described in Annex I of Regulation (EU) 2017/745 (MDR).

Furthermore, we confirm compliance with the requirements of national law, the applicable technical rules, and the requirements of EN ISO 10535:2021 standard for the body support systems mentioned in this declaration.
